Precyse Showcases Top Tools for Smooth Transition to ICD-10 at AHIMA 2014

HIM technology and services leader offers key HIM events and demonstrates technology enhancements

San Diego, CA: September 28, 2014 — Precyse, an industry leader in Health Information Management (HIM) Performance Management services and technologies, invites AHIMA 2014 show attendees to visit booth **#1617** and see how it is driving the power of information with the only HFMA Peer Reviewed HIM Technology and Services Suite. Attendees will experience live demonstrations of the newest enhancements to precyseCode™ computer-assisted coding and precyseCDI,™ offered in one integrated platform that incorporates state-of-art Natural Language Processing (NLP) for embedded intelligence, and supports multiple HIM roles across your organization.

Another star feature at the show booth will be Precyse University, the company's innovative, complete and widely adopted on-site, online and mobile ICD-10 education solution. This unique and comprehensive ICD-10 education solution is delivered exclusively through HealthStream's workforce development platform and is used by approximately 1.6 million learners for ICD-10 readiness. Visit the Precyse booth and see why Precyse received a 100% client satisfaction score for its ICD-10 education solution, appraised by clients as a mature, comprehensive and flexible training program.¹

On September 30th, for the fourth consecutive year, Precyse will assemble the HIM Innovation Community, led by Linda Kloss, MA, RHIA, FAHIMA, president of Kloss Strategic Advisors and former CEO of AHIMA. Comprised of Precyse thought leaders and HIM professionals from top healthcare institutions in North America, the assembly will convene with an overarching goal to gain insight from community members on the state of information and data governance. Our community members are leaders and as such, we are interested to hear how they are transforming HIM in their respective venues.

Additionally, Precyse will host its annual Precyse University User Group collaboration meeting, also on September 30. The meeting offers attendees the opportunity to collaborate with their Precyse University peers about ICD-10 education and transition, the impact of the delay's impact on user groups' plans, effective strategies used to drive utilization, and an exciting - and exclusive - sneak peek at the newest Precyse University technology coming soon.

Precyse is proud to be an AHIMA Diamond Partner and support the AHIMA Foundation as a Platinum Partner.
