

CASE MANAGEMENT / UTILIZATION REVIEW CONSULTING

Strengthen the critical link between clinical and financial operations

Case management and utilization review (CM/UR) functions are a critical link between a healthcare organization's clinical and financial operations and growing more important as organizations position themselves for healthcare reform. Case Managers and Utilization Reviewers can impact the quality of care, timely and appropriate reimbursement, and patient satisfaction – all necessary focus areas for sustainability in the new era of healthcare.

Precyse provides expertise to revitalize your CM/UR program, and can help provide solutions to help solve some of today's most challenging issues, such as:

- Value-Based Purchasing initiatives (30-day Readmission, Medicare Cost per Beneficiary)
- Increases in avoidable days
- Unacceptable patient lengths of stay
- High cost per case
- Increasing denials related to patient status

CASE MANAGEMENT / UTILIZATION REVIEW CONSULTING

Case Manager Roles Have Direct Impact on Value Based Purchasing Domains*

2015 VBP Domains

Is your Case Management team optimizing their impact on Value Based Purchasing?

*Centers for Medicare and Medicaid Services

Precyse's CM/UR Consulting Service provides a three phase approach including an independent assessment, program redesign and implementation, and on-going performance monitoring of your CM/UR program. Our offering includes on-site education provided by practicing physicians and case management experts. This education, consultation and coaching can be complemented by the Precyse University DNA™ healthcare performance optimization and education, which provides convenient on-line education, and applies assessments and analytics to pinpoint your team's case management knowledge gaps and progress.

Precyse offers well-rounded, seasoned consultants that not only possess expertise in CM/UR, but have experience in other areas, including clinical documentation improvement, coding, and other revenue cycle functions. This broader view of clinical plus revenue cycle issues and practices allows Precyse to create a more comprehensive and strategic plan to not only enhance the CM/UR program, but to also understand the clinical and revenue cycle impact of changes made to your program.

FEATURES

- Evaluate case management and utilization review processes
- Deliver on-site education and mentoring
- Build or redesign CM/UR program infrastructure
- Check on-going program progress through onsite visits and metrics review
- Optional on-line CM/UR performance optimization and education (Precyse University DNA)
- Optional Clinical Documentation Improvement Consulting for a broader solution
- Flexibility to choose one, two or three phases of the service

BENEFITS

- Integrate your financial and clinical operations for new era revenue cycle challenges
- Thrive in a Value-based Purchasing world – improve 30-day Readmission and Medicare Cost per Beneficiary
- Drive down average length of stay
- Reduce cost per case
- Avoid denials related to avoidable days

The Three Phases of the Precyse CM/UR Solution

PHASE I: ASSESS	PHASE II: IMPLEMENT	PHASE III: SUSTAIN
